Site: Lil Uzi Vert

Creative Director: Rob Hall

Designer: Samantha B

Overall:

Overall it looks very good! For the most part, the desktop view works. The black and purple work together just as I imagined, and the hints of lime green accent it very well. The text and type treatment also works well. With that being said, here are just a few things :

1. On the home page it may look better with the green text right aligned with "lil Uzi vert" instead of centered

2. On early life, I'm p sure the two photos are supposed to be side by side but on my browser it's one on top of the other. Not sure why, but that should probably be fixed.

3. The bottom left corner of personal life feels kind of empty, maybe the addition of one more photo would help to fill it out.

4. The site isn't scaling to mobile very well - I'm unsure if we were supposed to make it do that or not, but it is something to keep in mind.

5. You could add a footer saying u designed the site!
